

The All-On-4®

Denture with Titanium Milled Overbar

Keating Dental Lab has provided dental practices with the highest quality restorations, paired with reliable, friendly service since 2002.

As a family-run full-service dental lab, we treat our dentists like we would our own. Our goal is to provide doctors with the expertise of a national lab, and the convenience of a local laboratory partner.

HIGH STABILITY, HIGH SATISFACTION

Our All-On-4® restorative solution uses as few as four implants to support a full-arch prosthesis, providing superior stability and aesthetics in an affordable restoration for edentulous and soon-to-be edentulous patients.

Patients experience high satisfaction with this restorative option, receiving a fixed, full-arch prosthesis on the day of surgery. Our titanium milled denture overbar ensures no movement with implant-supported stability. Our zirconia hybrid bridge, fabricated from high-strength, high-translucency zirconia, renews everyday function for your patients while providing the lifelike aesthetics of a natural smile.

ALL-ON-4® KEY BENEFITS:

- No bone grafting necessary with tilted posterior implants
- Shorter treatment times
- Improved function, speech, and aesthetics
- Immediate loading shortens time-to-teeth
