

Porcelain-Fused-to-Metal

Hand-Stacked for Superior Aesthetics

Keating Dental Lab has provided dental practices with the highest quality restorations, paired with reliable, friendly service since 2002.

As a family-run full-service dental lab, we treat our dentists like we would our own. Our goal is to provide doctors with the expertise of a national lab, and the convenience of a local laboratory partner.

EMBRACE THE POWER OF THE PFM WITH NORITAKE EX-3

Our experienced team of casting technicians and ceramists make each PFM restoration with attention to detail and a high level of structural integrity to maximize longevity. Metal substructures are designed with strength in mind in addition to an even layer of porcelain to avoid fracture. Long-span bridges can mean deep feathered margins, partial adaptation and parallelism; PFMs remain the go-to product for success in avoiding these concerns. Using top-end alloy from Ivoclar and Noritake EX-3 porcelain, our PFM enables the ability to restore crowns and bridges anywhere in the mouth without sacrificing strength or vitality.

INDICATIONS FOR THE PFM:

- Conventional crowns and bridges of any size
- Alleviates parallelism concerns
- Crowns with attachments to cast partials
- Can be adapted to an existing RPD
